Education

JD College of Engineering and Management

Aug 2023 - May 2027

Bachelor of Technology in Artificial Intelligence, CGPA: 8.04

Nagpur

Relevant Coursework

- Object Oriented Programming
- Operating System
- Data Analysis
- Database Management System
- Data Structures & Algorithms

Projects

Chatbot System (Python, NLP Libraries, Text Processing)

- Designed and engineered an interactive conversational chatbot agent leveraging standard Python Natural Language Processing (NLP) libraries.
- Implemented text parsing workflows to process incoming user queries and deliver automated, contextual script responses.
- Optimized script execution logic for local deployment environments to handle basic real-time query inputs.

Spam Detection Model (Python, Machine Learning, Scikit-Learn, Feature Extraction)

- Built and deployed a supervised machine learning classification pipeline engineered to isolate and identify spam patterns in email data blocks.
- Executed essential text processing and feature extraction routines, utilizing tokenization patterns to format unstructured message strings.
- Evaluated model classification accuracy metrics to achieve clean classification boundaries and prevent false positives.

Movie Ticket Booking System (HTML5, CSS3, JavaScript, Web Frontend)

- Developed a single-page interactive seat booking web application built on native frontend architecture.
- Programmed client-side interactive logic with JavaScript to track real-time seat states, user selections, and dynamic booking parameters.
- Applied modern responsive design criteria to provide complete interface layout alignment across desktop and mobile browsers., vehicle insights, and customer/driver ratings.

Technical Skills

Languages: Python, Java, Html, SQL

Tools / Platforms: Git, Google Colab, VS Code, MS Excel, Google Sheets, Power BI

Libraries / Framework: Numpy, Pandas, Scikit-Learn,

Databases: PostgreSQL, SQLite, MongoDB

Achievements

- Generative AI: Elevate your Career — IBM (Coursera)
- Introduction to Javascript: Basics — Coursera Project Network
- Testing Basics and Test Management — Infosys Springboard
- Basics of Business Communication — Infosys Springboard

EXPERIENCE

Oasis Infobyte (An ISO 9001:2015 & MSME Certified Org)

Remote

AICTE OIB-SIP Python Programming Intern

June 2025 – July 2025

- Selected for a 1-month professional engineering track completing data tasks with outstanding remarks
- .Written modular functional source code routines, handled program optimization, and debugged errors.
- Executed code blocks, handled error exceptions, and deployed standalone scripts across mini-projects.

Position of Responsibility

Marpu Foundation

Remote

Social Media Impact Intern (Social Awareness Wing)

June 2025 – July 2025

- Spearheaded digital outreach initiatives within the social awareness wing to drive community alignment strategies.
- Managed content distribution logic and coordinated with multi-functional teams to expand project campaign visibility.
- Analyzed audience interaction indicators to optimize educational messaging deliverables across regional demographics.
